

SMARTGLASS

Roof Glass

SMARTGLASS is packed with intelligent features that offer exceptional performance and comfort, without compromising style.

SMARTGLASS is the smart choice for installers who want a product that does it all. Designed with conservatories in mind, this innovative glass lives up to its name with a range of intelligent features that offer homeowners exceptional performance and comfort, without compromising style.

With our advanced SMARTGLASS, conservatories are warmer in the winter and cooler all summer long, thanks to its clever temperature-regulating properties.

Additionally, it's almost three times more efficient at keeping warmth in than standard double glazing, reflecting up to 86% of the sun's heat while still filling the room with light.

From antiglare and self-cleaning capabilities to soundproofing and warm edge technology, it's unsurpassed in terms of performance and intelligent design features.
