 **EcoMAX** Sun<sup>®</sup>

 **EcoMAX** Sun<sup>©</sup>

## Added **Green** credentials

The most eco-friendly glass window unit on the UK market  
now with added energy-saving benefits

[www.claytonglass.co.uk](http://www.claytonglass.co.uk)

# Introducing our latest innovative product **EcoMaxSun**®

**EcoMaxSun**® has been designed around our **EcoMax**™ unit but has added benefits.

Designed for both domestic and commercial use, **EcoMaxSun**® is the ultimate glazing solution when it comes to cooling down living and working environments.

With a U value of 1.0, combined with maximised heat reflection, UV reduction, noise reduction, security and safety, **EcoMaxSun**® is one of the most advanced IGU's on the market

By installing **EcoMaxSun**®, you will be introducing a new line of cost-effective and eco-friendly glass that aims to make a positive impact. **EcoMaxSun**® is made in the UK, with our growing commitment to renewable energy sources. It is created in one of the most energy efficient manufacturing facilities in the UK, utilising the highest quality recycled materials, along with an organic sealant that renders the system nearly 100% biodegradable.

# Cooler, quieter, safer...

No need for air-conditioning or fans, saving on energy bills

[www.claytonglass.co.uk](http://www.claytonglass.co.uk)

# Why choose EcoMaxSun<sup>©</sup>

-  **1.0 u-value – the best performing in a double glazed unit**
-  **99% UV reduction – meaning furnishings keep the colour for longer without the harsh UV solar rays**
-  **Reflecting 65% of the sun's heat from entering the room.  
Double that of a typical 4/20/4 IGU, resulting cooler, relaxing environments**
-  **Constructed using a laminate safety glass for added security and safety.**
-  **Quieter living – Rw of 37Db  
25% better than a typical 4/20/4 IGU.**
-  **Uses our almost 100% biodegradable EcoMAX Glass™,  
the most eco-friendly glass window unit on the UK market.**
